Computer Networks: Final Remarks
Adrian Perrig
How to prepare for Exam

- Study concepts, not the details
- Review lecture slides and book, but focus on slides
- Suggestion: use delayed repetition approach
  - After studying a topic, review it after 1-2 days, then again after 5-7 days, and finally after 2-3 weeks
  - Create flash cards with important knowledge you want to remember for a long time
- Review materials with friends
- Excellent resource: study Section 6.7 in the book, entitled Retrospective: A Day in the Life of a Web Page Request
  - Attempt to enumerate all the networking steps from system boot to web page rendering
  - Then use Section 6.7 to see if you are missing any points
Thanks!

- Thank you for the excellent in-class participation!
- Enjoy the Summer and good luck on the exam!
